

# Protect your customers and staff from harmful airborne pathogens with Pūrigo.

## Stay face to face, fearlessly.

Welcome your employees, customers, and clients back to your offices safely with Pūrigo—a crucial part of any business continuity plan. Pūrigo's continuous, medical-grade air sanitization is designed to eliminate harmful airborne microorganisms, including bacteria and viruses like influenza, COVID-19, and its variants, offering additional health security for indoor spaces and powerful peace of mind.

### The impact of commercial-associated infections.

## Pūrigo helps businesses stay open and operate safely.

By combining multi-level filtration with powerful SteriDuct™ UV-C technology, Pūrigo works in addition to your existing HVAC filters. That means your team can get back to work safely, protected by Pūrigo's localized, supplemental air sanitization that works in indoor spaces of any size.

## Powerful air hygiene technology engineered for indoor spaces.

- Demonstrates a 99.99% kill rate against harmful airborne microorganisms, including bacteria, viruses and fungi in indoor spaces in less than one hour, providing continuous sanitization all day.
- Meets the air quality safety standards outlined by ASHRAE and the CDC as suggested to support normal return to work.
- Has been tested and validated by multiple independent and accredited laboratories to significantly improve air quality.

# Powerful protection and peace of mind.

## That's a breath of fresh air.

Your staff and customers can return to work safely with Pürgo, delivering safe and continuous medical-grade air sanitization in all the spaces your team gathers, such as conference rooms, cafeterias, shared spaces, and more.

Pürgo's proprietary technology creates safer spaces for all. **Except pathogens.**

- **Tough on germs. Safe for people.** Pürgo uses state-of-the-art technology that safely optimizes germicidal UV exposure to destroy harmful airborne microorganisms.
- **Proven performance.** Pürgo has been tested and validated by multiple independent and accredited laboratories to significantly improve air quality by reducing airborne viruses, bacteria and fungi.
- **Starts working immediately.** Pürgo starts to eliminate airborne microorganisms in minutes, providing continuous air sanitization all day.

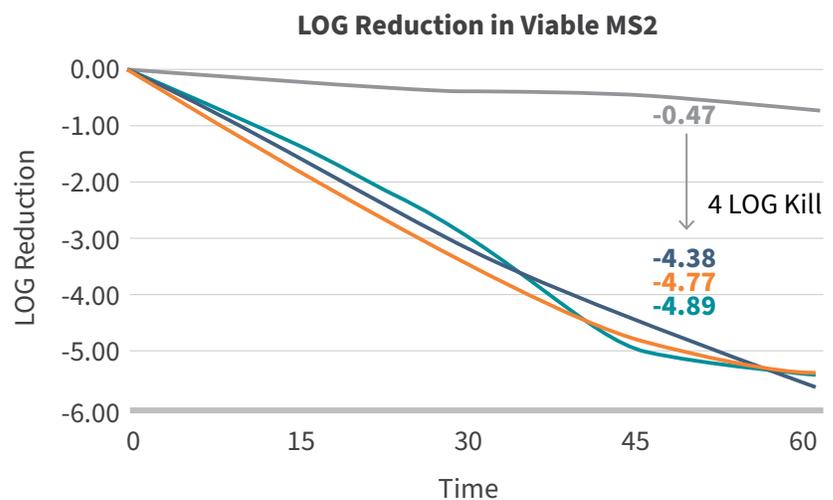

### Specifications

Technology	SteriDuct™ UV-C LED
Filter set	Pre-filter, carbon, HEPA (H14)
Efficacy	Eliminates 99.995% of microorganisms and particles down to 0.1 µm (micron)
Airflow	160-300 CFM
Coverage	4 to 6 air changes/hour in a 3000 ft <sup>3</sup> room
Dimensions	25.8in x 10.6in x 19.5in, 44LB (27.5in with casters)
Power	120W Max, 115 VAC 60 Hz
Noise	45-67dB
Maintenance	Filter cartridge: 6-months Service: 18-months
Warranty	Limited 3-year
FDA Clearance	510(k) Class II: Cleared for medical use to eliminate harmful airborne microorganisms including bacteria, viruses & mold, and collect particles

### A breath of fresh air for your business.

Pürgo is scientifically proven to eliminate airborne viruses in minutes.

Pürgo demonstrated 4.21 +/- 0.27 average Net Log Reduction after 45 minutes of the MS2 Bacteriophage, the surrogate pathogen for COVID-19.
