

Get powerful protection from harmful airborne pathogens with Pūrgo by AeroClean.

All the big moments. Less of the worry.

Welcome your athletes, guests, and staff back to your facility safely with Pūrgo and ensure you're implementing the latest federal guidelines* for improving indoor air quality, ventilation and enhanced air filtration. Pūrgo's continuous, medical-grade air sanitization is designed to eliminate harmful airborne microorganisms, including bacteria and viruses like influenza, COVID-19, and its variants, offering additional health security and dramatically improving air hygiene in indoor spaces.

**As referenced in the "EPA's Clean Air in Buildings Challenge," a key component of the National COVID-19 Preparedness Plan.
**CFCs, flame retardants, solvents and vapors emitted by paints and building materials*

Breathe easy with continuous air sanitization engineered for any indoor space.

Pūrgo uses multiple layers of filtration plus SteriDuct's patented UV-C LED technology to filter and eliminate harmful airborne microorganisms. This prevents recontamination and cross infection in indoor spaces, providing powerful peace of mind for athletes, guests, and staff. Pūrgo devices can be easily wheeled into different locations and configured as needed to fit any space.

Ideal for:

- Gyms
- Locker Rooms
- Box Suites
- Office Areas

Ready, set, gone

Demonstrates a 99.99% kill rate against harmful airborne microorganisms in less than an hour.

Patented technology

Pūrgo uses patented SteriDuct™ technology that uses safe, solid-state UV-C emitters at the optimum wavelength to eliminate harmful microorganisms.

Active sanitization

Pūrgo provides continuous protection, sanitizing and exchanging the air between four and six times per hour.

Compact and powerful

Pūrgo fits anywhere and is powerful enough to meet the air quality safety standards outlined by ASHRAE and the CDC for hospital patient rooms.

Powerful protection and peace of mind.

That's a breath of fresh air.

Your athletes, guests, and staff can breathe easy with Pūrigo's powerful protection from airborne microorganisms. Keep making the most of every day with continuous protection for sports arenas, entertainment venues, hotels, recreational facilities, and more.

Pūrigo's proprietary technology creates safer spaces for all. **Except pathogens.**

- **Tough on germs. Safe for people.** Pūrigo uses state-of-the-art technology that safely optimizes germicidal UV exposure to destroy harmful airborne microorganisms.
- **Proven performance.** Pūrigo has been tested and validated by multiple independent and accredited laboratories to significantly improve air quality by reducing airborne viruses, bacteria, and fungi.
- **Starts working immediately.** Pūrigo starts eliminating harmful airborne microorganisms in minutes, providing continuous sanitization and protection for indoor spaces all day.

Specifications

Technology	SteriDuct™ UV-C LED
Filter set	Pre-filter, carbon, HEPA (H14)
Efficacy	Eliminates 99.995% of microorganisms and particles down to 0.1 μm (micron)
Airflow	160-300 CFM
Coverage	4 to 6 air changes/hour in a 3000 ft ³ room
Dimensions	25.8in x 10.6in x 19.5in, 44LB (27.5in with casters)
Power	120W Max, 115 VAC 60 Hz
Noise	45-67dB
Maintenance	Filter cartridge: 6-months Service: 18-months
Warranty	Limited 3-year
FDA Clearance	510(k) Class II: Cleared for medical use to eliminate harmful airborne microorganisms including bacteria, viruses & mold, and collect particles

A breath of fresh air for your business.

Pūrigo is scientifically proven to eliminate airborne viruses in minutes.

Pūrigo demonstrated 4.21 +/- 0.27 average Net Log Reduction after 45 minutes of the MS2 Bacteriophage, the surrogate pathogen for COVID-19.
